Junta recomendada 8-10 mm. Recommended joint 8-10 mm. Joint recommandé 8-10 mm. Рекомендуемый шов 8-10 mm.

M²/ML CONVENCIONAL. Los productos de EXAGRES no se suministran a m² o ml (metro lineal) completo, sino calculando una junta convencional de colocación. No se admitirán, por lo tanto, reclamaciones referentes al número de piezas suministradas. La unidad de medida (m² o ml) de Exagres está basada en la medida de coordinación de las piezas, que es la suma de la dimensión de fabricación más la junta recomendada.

M²/ML CONVENTIONAL. EXAGRES products are not supplied in full m² or ml (linear meter), but by calculating a conventional installation joint. Therefore, no claims will be accepted regarding the number of pieces supplied. The Exagres unit of measurement (m² or ml) is based on the coordinating measurement of the pieces, which is the sum of the manufacturing dimension plus the recommended joint.

M²/ML CONVENTIONNEL. Les produits EXAGRES ne sont pas fournis au m² ou au ml (mètre linéaire) dans leur intégralité, mais en calculant un joint de pose conventionnel. Par conséquent, aucune réclamation ne sera acceptée concernant le nombre de pièces fournies. L'unité de mesure Exagres (m² ou ml) est basée sur les coordonnées des pièces, qui sont la somme de la dimension de fabrication et du joint recommandé.

M²/ML ОБЫЧНЫЙ. Продукция EXAGRES поставляется не полностью за м² или мл (погонный метр), а по расчету обычного монтажного шва. Поэтому претензии по количеству поставленных изделий не принимаются. Единица измерения Exagres (м² или мл) основана на координатном размере деталей, который представляет собой сумму производственного размера плюс рекомендуемый шов.
